East Bay Nursery

Variegated Flowering Maple

Abutilon pictum 'Thompsonii'

Height: 4 feet

Spread: 3 feet

Sunlight: ○ ◐

Hardiness Zone: 10a

Description:

Beautiful variegated green and yellow palmate leaves are the focus on this wonderful multi-stemmed variety; presenting bold and vibrant, orange bell shaped flowers from spring until fall; mounded habit creates the ideal addition to containers and gardens

Ornamental Features

Variegated Flowering Maple features bold orange bell-shaped flowers along the branches from mid spring to mid fall. It has attractive yellow-variegated green foliage. The lobed palmate leaves are highly ornamental and remain green throughout the winter.

Landscape Attributes

Variegated Flowering Maple is a multi-stemmed evergreen shrub with a more or less rounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting butterflies and hummingbirds to your yard. It has no significant negative characteristics.

Variegated Flowering Maple is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use
- Container Planting

Planting & Growing

Variegated Flowering Maple will grow to be about 4 feet tall at maturity, with a spread of 3 feet. It has a low canopy. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Variegated Flowering Maple makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
