Mickie Rockrose

Cistus 'Mickie'

Height: 18 inches

Spread: 3 feet

Sunlight: ○

Hardiness Zone: 7a

Other Names: Sunrose, Rock Rose

Description:

Vivid golden and gray-green variegated foliage; clusters of pretty white flowers with contrasting gold centers in late spring; a great groundcover or rock garden plant; tolerant of poor, dry soils, hot garden locations and salt spray

Ornamental Features

Mickie Rockrose features showy white cup-shaped flowers with gold eyes at the ends of the branches from late spring to early summer. It has attractive grayish green foliage edged in gold. The fuzzy pointy leaves are highly ornamental and remain grayish green throughout the winter.

Landscape Attributes

Mickie Rockrose is a dense multi-stemmed evergreen shrub with a mounded form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance shrub, and should only be pruned after flowering to avoid removing any of the current season's flowers. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Planting & Growing

Mickie Rockrose will grow to be about 18 inches tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years.

This shrub should only be grown in full sunlight. It prefers dry to average moisture levels with very well-drained soil, and will often die in standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is not particular as to soil type or pH, and is able to handle environmental salt. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.

Mickie Rockrose makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the thriller plants stand out. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
