East Bay Nursery

Hooded Dwarf Elephant's Ear

Alocasia cucullata

Height: 3 feet

Spread: 3 feet

Sunlight: ◐

Hardiness Zone: 7b

Other Names: Chinese Taro, Buddah's Hand

Description:

This small variety produces attractive heart shaped leaves with thick veining on the undersides, curly tips and upturned leaf margins; eventually forms a nice thick clump, fast growing but doesn't get to large; an excellent indoor accent plant

Features & Attributes

Hooded Dwarf Elephant's Ear's attractive small glossy heart-shaped leaves remain dark green in color throughout the year on a plant with an upright spreading habit of growth. It features solitary conical bluish-green hooded flowers rising above the foliage in mid summer.

This is an open herbaceous evergreen houseplant with an upright spreading habit of growth. This plant usually looks its best without pruning, although it will tolerate pruning.

Planting & Growing

When grown indoors, Hooded Dwarf Elephant's Ear can be expected to grow to be about 3 feet tall at maturity, with a spread of 3 feet. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 5 years. This houseplant should be situated in a location that that gets indirect sunlight at most, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It is quite adaptable, prefering to grow in average to wet conditions, and will even tolerate some standing water. The surface of the soil should be kept consistently moist all of the time, and you should expect to water this plant two or more times each week, especially if it's growing in a low-humidity environment. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil type or pH; an average potting soil should work just fine. Be warned that parts of this plant are known to be toxic to humans and animals, so special care should be exercised if growing it around children and pets.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.
