**Description:**

A popular indoor plant that is easy to grow and care for; produces densely clustered dark green glossy leaves with cream stripes; can be used as an accent tabletop or floor plant; tolerates low light areas

**Features & Attributes**

Song of Jamaica Plant's attractive glossy pointy leaves remain green in color with prominent creamy white stripes throughout the year on a plant with an upright spreading habit of growth. The dark green stems can be quite attractive and add to the plant's interest.

This is an herbaceous evergreen houseplant with an upright spreading habit of growth. Its relatively coarse texture stands it apart from other indoor plants with finer foliage. This plant may benefit from an occasional pruning to look its best.

**Planting & Growing**

When grown indoors, Song of Jamaica Plant can be expected to grow to be about 8 feet tall at maturity, with a spread of 4 feet. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. This houseplant performs well in both bright or indirect sunlight and strong artificial light, and can therefore be situated in almost any well-lit room or location. It does best in average to evenly moist soil, but will not tolerate standing water. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil type or pH; an average potting soil should work just fine.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.
