Height: 30 inches

Spread: 20 inches

Sunlight:

Hardiness Zone: 9b

Group/Class: Mystic Series

Description:

These hot pink and yellow flowers sitting atop black glossy foliage are perfect for adding a splash of colour and flare to any patio container or garden; a compact, sun-loving variety makes it perfect for warmer climates; does not need staking

Ornamental Features

Mystic Sparkler Dahlia features showy lightly-scented hot pink daisy flowers with black eyes and a yellow ring at the ends of the stems from mid to late summer. The flowers are excellent for cutting. Its attractive glossy pointy leaves remain black in color throughout the season.

Landscape Attributes

Mystic Sparkler Dahlia is an herbaceous perennial with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep, and should be cut back in late fall in preparation for winter. It is a good choice for attracting bees and butterflies to your yard. It has no significant negative characteristics.

Mystic Sparkler Dahlia is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Mystic Sparkler Dahlia will grow to be about 30 inches tall at maturity, with a spread of 20 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Mystic Sparkler Dahlia is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
