Rising Sun® Chestnut Gold Coneflower

Rudbeckia hirta 'Rising Sun Chestnut Gold'

Height: 22 inches

Spread: 24 inches

Spacing: 14 inches

Sunlight: ○ ◐

Hardiness Zone: (annual)

Other Names: Gloriosa Daisy, Black Eyed Susan

Description:

A well branched, compact variety that features giant 5" blooms of gold, orange and red, rising above green foliage; these upward facing, pollinator attracting beauties are wonderful in patio containers, borders and garden landscapes; low maintenance

Ornamental Features

Rising Sun Chestnut Gold Coneflower has masses of beautiful gold daisy flowers with dark brown eyes and orange centers at the ends of the stems from early summer to mid fall, which are most effective when planted in groupings. The flowers are excellent for cutting. Its pointy leaves remain green in color throughout the season.

Landscape Attributes

Rising Sun Chestnut Gold Coneflower is an herbaceous annual with a more or less rounded form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and may require the occasional pruning to look its best. It is a good choice for attracting butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Self-Seeding

Rising Sun Chestnut Gold Coneflower is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Rising Sun Chestnut Gold Coneflower will grow to be about 18 inches tall at maturity, with a spread of 24 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 14 inches apart. This fast-growing annual will normally live for one full growing season, needing replacement the following year. However, this species tends to self-seed and may thereby endure for years in the garden if allowed.

This plant does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This is a selection of a native North American species. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Rising Sun Chestnut Gold Coneflower is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It can be used either as 'filler' or as a 'thriller' in the 'spiller-thriller-filler' container combination, depending on the height and form of the other plants used in the container planting. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
