Height: 12 inches

Spread: 4 feet

Spacing: 18 inches

Sunlight: ○

Hardiness Zone: (annual)

**Description:**

Easy to grow, perfect for any gardener; produces heavy yields of large, elongated tubers that are red skinned with bright orange flesh; sweet and delicious, a perfect selection for baking, pies and chips

**Edible Qualities**

Red Garnet Sweet Potato is an annual vegetable plant that is commonly grown for its edible qualities. It produces large brick red oblong tubers with orange flesh which are typically harvested when mature. The tubers have a sweet taste and a firm texture.

The tubers are most often used in the following ways:

- Eating When Cooked/Prepared
- Cooking
- Baking

**Planting & Growing**

Red Garnet Sweet Potato will grow to be about 12 inches tall at maturity, with a spread of 4 feet. When planted in rows, individual plants should be spaced approximately 18 inches apart. This vegetable plant is an annual, which means that it will grow for one season in your garden and then die after producing a crop.

This plant is typically grown in a designated vegetable garden. It should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant does not require much in the way of fertilizing once established. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.
