Plant Height: 6 inches

Flower Height: 9 inches

Spread: 6 inches

Sunlight: ○ ◐

Hardiness Zone: 9b

Description:

A lovely compact selection perfect for small gardens, borders or containers; fully doubled orange blooms rise above lush green foliage in the early to mid spring; easy to grow with a tidy habit; attracts pollinators

Ornamental Features

Sprinkles Orange Ranunculus has masses of beautiful double orange round flowers at the ends of the stems from early to mid spring, which are most effective when planted in groupings. The flowers are excellent for cutting. Its serrated lobed leaves remain green in color throughout the season.

Landscape Attributes

Sprinkles Orange Ranunculus is an herbaceous perennial with an upright spreading habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and should be cut back in late fall in preparation for winter. It is a good choice for attracting bees and butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Sprinkles Orange Ranunculus is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Naturalizing And Woodland Gardens
- Container Planting

Planting & Growing

Sprinkles Orange Ranunculus will grow to be only 6 inches tall at maturity extending to 9 inches tall with the flowers, with a spread of 6 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 5 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It requires an evenly moist well-drained soil for optimal growth. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Sprinkles Orange Ranunculus is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
