Height: 12 feet

Spread: 7 feet

Sunlight: ○ ◐

Hardiness Zone: 9a

Other Names: Parlor Maple

Description:

This variety produces stunning, bell-shaped orange blooms year round, with the largest flush in spring through summer; an erect, bushy shrub that may be shaped into a small tree; a perfect container plant; attracts hummingbirds

Ornamental Features

Orange Glow Flowering Maple features showy orange bell-shaped flowers with chartreuse eyes and buttery yellow calyces at the ends of the branches from early spring to mid fall. It has buttery yellow-spotted forest green foliage which emerges light green in spring. The serrated lobed leaves remain forest green throughout the winter.

Landscape Attributes

Orange Glow Flowering Maple is a multi-stemmed evergreen shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting butterflies and hummingbirds to your yard. It has no significant negative characteristics.

Orange Glow Flowering Maple is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use
- Container Planting

Planting & Growing

Orange Glow Flowering Maple will grow to be about 12 feet tall at maturity, with a spread of 7 feet. It has a low canopy with a typical clearance of 1 foot from the ground, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. To help this plant achive its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Orange Glow Flowering Maple makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Its large size and upright habit of growth lend it for use as a solitary accent, or in a composition surrounded by smaller plants around the base and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
