East Bay Nursery

Evening Glow Mirror Bush

Coprosma repens 'Evening Glow'

Height: 5 feet

Spread: 4 feet

Sunlight: ○ ◐

Hardiness Zone: 8b

Other Names: Looking Glass Plant

Description:

Emerging green foliage with yellow margins in spring and summer, become intensely orange and red flushed in fall through winter; an extraordinary variety perfect for shaping into topiaries or hedges; visually stunning

Ornamental Features

Evening Glow Mirror Bush has attractive yellow-variegated lime green foliage with hints of orange which emerges chartreuse in spring on a plant with an upright spreading habit of growth. The small glossy oval leaves are highly ornamental and turn outstanding shades of orange, dark red and burgundy in the fall, which persists throughout the winter.

Landscape Attributes

Evening Glow Mirror Bush is a multi-stemmed evergreen shrub with an upright spreading habit of growth. It lends an extremely fine and delicate texture to the landscape composition which can make it a great accent feature on this basis alone.

This is a relatively low maintenance shrub, and can be pruned at anytime. It has no significant negative characteristics.

Evening Glow Mirror Bush is recommended for the following landscape applications;

Planting & Growing

Evening Glow Mirror Bush will grow to be about 5 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.

Evening Glow Mirror Bush makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
