Height: 3 feet

Spread: 24 inches

Sunlight: ◐ ●

Hardiness Zone: 9b

Description:

A wonderful selection presenting deep green, heart leaf foliage, with an interesting quilted texture and silver-metallic sheen; great for indoor containers as a tropical accent; prefers bright, indirect sunlight; low maintenance and easy to grow

Features & Attributes

Peltatum Philodendron's attractive large crinkled lobed leaves remain dark green in color with distinctive creamy white veins and tinges of silver throughout the year on a plant with an upright spreading habit of growth.

This is a dense multi-stemmed evergreen houseplant with an upright spreading habit of growth. Its wonderfully bold, coarse texture is quite ornamental and should be used to full effect. This plant can be pruned at any time to keep it looking its best.

Planting & Growing

When grown indoors, Peltatum Philodendron can be expected to grow to be about 3 feet tall at maturity, with a spread of 24 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years. This houseplant performs well in both bright or indirect sunlight and strong artificial light, and can therefore be situated in almost any well-lit room or location. It prefers to grow in average to moist soil. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It will benefit from a regular feeding with a general-purpose fertilizer with every second or third watering. It is not particular as to soil type or pH; an average potting soil should work just fine. Be warned that parts of this plant are known to be toxic to humans and animals, so special care should be exercised if growing it around children and pets.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.
