Height: 3 feet

Spread: 3 feet

Sunlight:

Hardiness Zone: 6b

Other Names: Shrubby Veronica

Description:

Warm purple flowers grace this attractive shrub throughout the summer; richly variegated gray green, cream foliage with dark green veins; perfect for adding color to a shrub border and is also a great container plant

Ornamental Features

Variegated Hebe has masses of beautiful corymbs of purple flowers rising above the foliage from early summer to early fall, which are most effective when planted in groupings. It has attractive creamy white-variegated grayish green foliage with hints of dark green. The glossy oval leaves are highly ornamental and remain grayish green throughout the winter.

Landscape Attributes

Variegated Hebe is an open multi-stemmed evergreen shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting birds, bees and butterflies to your yard. It has no significant negative characteristics.

Variegated Hebe is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Container Planting

Planting & Growing

Variegated Hebe will grow to be about 3 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years.

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.

Variegated Hebe makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
